MURRAY & ROBERTS AWARDED A FURTHER R3,7 BILLION IN NEW UNDERGROUND MINING PROJECTS

Stakeholders are referred to the announcement released on the Stock Exchange News Service of the JSE Limited on 16 March 2018, regarding the award of R3,8 billion in new underground mining projects.

Further to that announcement, Murray & Roberts has been awarded additional underground mining projects in the sub-Saharan, North American and Australasian markets to the value of R3,7 billion. These awards include projects for diamond, gold, copper, salt and platinum mines, to be delivered over a period of two to three years.

This calendar year, the Group has been awarded a total of R7,5 billion of mining project work, most of which were included in near orders as reported with the Company’s December 2017 interim results. This growth in the order book supports market research guidance of the recovery in capex spending by mining firms globally and the view of the longevity of a mining capex cycle.

The Company continues to be well-positioned to potentially secure more mining projects in the near term.
